

Printable ruler

A 10 inch ruler marked to 1/16 inch and a 25 cm ruler marked to the millimetre, both at exact size.

1. Print at 100% (Actual size), never Fit to page.
2. Check the scale with a bank card or the bars below.
3. Cut along the grey lines. The marks start at the cut edge, so cut on the line, not beside it.

Check the scale with a bank card

Any bank card is 85.60 x 53.98 mm. If it covers the outline exactly, the sheet printed at actual size.

Or measure the bars

This bar is exactly 100 mm long

This bar is exactly 4 inches long

Shorter than they should be? The print dialog scaled the page: set Scale to 100% and print again.
